

MUD MATters Ground Reinforcement Substructure
Distributed by Archway Control, LP

MUD MATters is an effective and eco-friendly solution for mud control and ground stabilization in various vehicle access and construction site applications. It is a grid system made of 100% recycled plastic that can be easily installed and removed on any terrain. MUD MATters offers the following benefits:

- Excellent water drainage through the surface, preventing soil erosion and flooding
- Interlocking design that creates a stable and self-supporting structure, capable of bearing heavy loads
- Durable, non-rotting and weather resistant, suitable for all seasons and climates
- Frost and UV-resistant, preventing cracking and fading
- Textured surface that provides traction and safety for foot and vehicle traffic
- Environmentally friendly, reducing the use of natural resources and minimizing waste

MUD MATters is ideal for use in areas where traditional paving methods are not feasible or desirable, such as wetlands, parks, farms, golf courses, campsites, etc. It can also be used to reinforce existing pavements or gravel surfaces, enhancing their performance and durability.

SPECIFICATIONS

Length: 19.69"

Width: 19.69"

Height: 2.12"

Weight/slab: 14.77 lbs.

Weight/m2: 59.08 lbs.

Coverage/slab: 2.69/ft²

Coverage: 4 units = 10.76 ft²

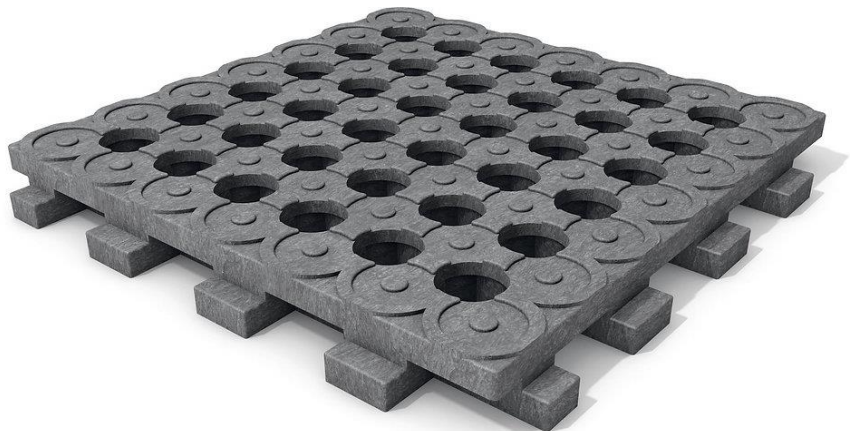

Items/pallet: 164 units

Coverage/pallet: 441 ft²

Material: 100% recycled plastic

Connection: Overlapping tabs

Color: Gray
